Control Room:

Studio B is a consummate mix and overdub room. At its heart is a 40 Channel SSL 4000E (With G+ computer) and an API 1604 sidecar, providing a total of 56 fully-automated Channels or world-class analogue summing. An extensive array of vintage and modern outboard gear provide a variety of sonic options to choose from. But perhaps the most compelling feature of Studio B, surpassing even its gear selection, is the laid-back, comfortable vice., Think of it as your audio home away from home.

Iso Spaces:

Two isolation spaces exist right off the Studio B control room allowing a variety of overdub scenarios. Both room are tied into a cue system and cable pass-throughs enable one room to serve as a mini control room for the other, allowing overdubs to take place independent as they are versatile, these spaces offer relaxing decor and lighting to create the perfect vibe.
